📍 College of Engineering, Mathematics and Physical Sciences, University of Exeter, EX4 4QJ

Employment

- present Lecturer in Engineering, CEMPS, **University of Exeter**
- My research aims to better understand the transition to turbulence in fluid flows.
 - I investigate fundamental fluids problems and how this translates to real-world industry.
 - To do this I develop new methods for highly parallel computational simulations.
 - I lecture & administer courses and supervise a number of Ph.D./M.Sc. projects.
 - Senior developer of the *Nektar++* spectral/*hp* element framework (www.nektar.info).
- 11/15 - 3/17 Research & Teaching Fellow, Dept. of Aeronautics, **Imperial College London**
6/11 - 11/15 Research Associate, Department of Aeronautics, **Imperial College London**

Education

- Jun. 2011 Ph.D. Mathematics, **University of Warwick**
thesis *Spatio-temporal dynamics in pipe flow*, supervised by [Prof. Dwight Barkley](#).
- Jun. 2007 M.Math. Mathematics (1st class hon.), **University of Warwick**
dissertation *Simulation of polymer chains using Monte Carlo methods*, supervised by [Prof. Mike Allen](#).
- Jun. 2003 **Queen Mary's Grammar School**
GCE A2 Mathematics, Further Mathematics, Physics, Computing (all at A grade).
GCSE 12 in total – 5A*, 5A, 2B. Mathematics and English at A*.

Awards

- Mar. 2017 **PRISM: Platform for Research In Simulation Methods (£1,612,965)**
Co-I on EPSRC Platform Grant EP/R029423/1.
- Nov. 2015 **ARCHER Leadership Project (£165,796)**
Co-I on EPSRC application for substantial leadership-scale computing resource on the UK national supercomputer ARCHER. This project will use around 20 million CPU hours to produce the first scale-resolving simulations over extremely complex Formula 1 geometries.
- Jun. 2015 ARCHER Resource Allocation Panel (£22,256)
Apr. 2015 PRISM platform grant project (6 months funding)
Apr. 2015 **Horizon 2020 project ExaFLOW (€346,125 at ICL, €3.3m total)**
I am a co-investigator and leader of the algorithmic development work package for the EU Horizon 2020 project ExaFLOW, which will develop numerical methods for CFD on exascale computing platforms. ICL is part of a consortium of 8 academic and industrial partners.
- Jul. 2014 EPCC Embedded CSE grant (1 person year)
Jan. 2014 ARCHER Resource Allocation Panel (£16,153)
Oct. 2007 EPSRC Ph.D. scholarship (£13,000 p.a.)

Publications

Journal Publications

- under review On weak Dirichlet boundary conditions for elliptic problems in the continuous Galerkin method
M. Vymazal, [D. Moxey](#), S. Sherwin, C. D. Cantwell and R. M. Kirby
under review in J. Comput. Phys.

- Interpolation error bounds for curvilinear finite elements and their implications on adaptive mesh refinement
D. Moxey, S. P. Sastry and R. M. Kirby
under review in J. Comput. Phys.
- in press [Accelerating high-order mesh generation with an architecture-independent programming model](#)
 J. Eichstädt, M. Green, M. Turner, J. Peiró and D. Moxey
to appear in Comput. Phys. Commun. DOI: [10.1016/j.cpc.2018.03.025](#).
- [Curvilinear mesh generation using a variational framework](#)
 M. Turner, J. Peiró and D. Moxey
to appear in Comput. Aided Design. DOI: [10.1016/j.cad.2017.10.004](#).
- 2018 [DNS of a compressible boundary layer flow past an isolated three-dimensional hump in a high-speed subsonic regime](#)
 D. de Grazia, D. Moxey, S. J. Sherwin, M. A. Kravtsova and A. I. Ruban
Phys. Rev. Fluids 3, p. 024101. DOI: [10.1103/PhysRevFluids.3.024101](#).
- 2017 [A \$p\$ -adaptation method for compressible flow problems using a goal-based error estimator](#)
 D. Ekelschot, D. Moxey, S. J. Sherwin and J. Peiró
Comput. Struct. 181, pp. 55–69. DOI: [10.1016/j.compstruc.2016.03.004](#).
- 2016 [An adaptable parallel algorithm for the direct numerical simulation of incompressible turbulent flows using a Fourier spectral/hp element method and MPI virtual topologies](#)
 A. Bolis, C. D. Cantwell, D. Moxey, D. Serson and S. J. Sherwin
Comput. Phys. Commun. 206, pp. 17–25. DOI: [10.1016/j.cpc.2016.04.011](#).
- [Implicit large-eddy simulation of a wingtip vortex](#)
 J.-E. W. Lombard, D. Moxey, S. J. Sherwin, J. F. A. Hoessler, S. Dhandapani and M. J. Taylor
AIAA J. 54 (2), pp. 506–518. DOI: [10.2514/1.J054181](#).
- [Optimizing the performance of the spectral/hp element method with collective linear algebra operations](#)
D. Moxey, C. D. Cantwell, R. M. Kirby and S. J. Sherwin
Comput. Meth. Appl. Mech. Eng. 310, pp. 628–645. DOI: [10.1016/j.cma.2016.07.001](#).
- [High-order curvilinear meshing using a thermo-elastic analogy](#)
D. Moxey, D. Ekelschot, Ü. Keskin, S. J. Sherwin and J. Peiró
Comput. Aided Design 72, pp. 130–139. DOI: [10.1016/j.cad.2015.09.007](#).
- [To CG or to HDG: a comparative study in 3D](#)
 S. Yakovlev, D. Moxey, S. J. Sherwin and R. M. Kirby

- [Stability of projection methods for incompressible flows using high order pressure-velocity pairs of same degree: Continuous and Discontinuous Galerkin formulations](#)
 E. Ferrer, D. Moxey, S. J. Sherwin and R. H. J. Willden
Commun. Comp. Phys. 16 (3), pp. 817–840. DOI: [10.4208/cicp.290114.170414a](#).

Connections between the discontinuous Galerkin method and high-order flux reconstruction schemes

D. de Grazia, G. Mengaldo, **D. Moxey**, P. E. Vincent and S. J. Sherwin
Int. J. Numer. Meth. Fl. 75 (12), pp. 860–877. DOI: [10.1002/flid.3915](https://doi.org/10.1002/flid.3915).

2011

The onset of turbulence in pipe flow

K. Avila, **D. Moxey**, A. de Lozar, M. Avila, D. Barkley and B. Hof
Science 333 (6039), pp. 192–196. published as a research article. DOI: [10.1126/science.1203223](https://doi.org/10.1126/science.1203223).

2010

Distinct large-scale turbulent-laminar states in transitional pipe flow

D. Moxey and D. Barkley
Proc. Nat. Acad. Sci. 107 (18), pp. 8091–8096. DOI: [10.1073/pnas.0909560107](https://doi.org/10.1073/pnas.0909560107).

Book Chapters

2015

On the generation of curvilinear meshes through subdivision of isoparametric elements.

D. Moxey, M. D. Green, S. J. Sherwin and J. Peiró.
New Challenges in Grid Generation and Adaptivity for Scientific Computing, pp. 203–215.
DOI: [10.1007/978-3-319-06053-8_10](https://doi.org/10.1007/978-3-319-06053-8_10).

Curvilinear mesh generation for boundary layer problems.

D. Moxey, M. Hazan, S. J. Sherwin and J. Peiró.
IDIHOM: Industrialization of High-Order Methods-A Top-Down Approach, pp. 41–64.
DOI: [10.1007/978-3-319-12886-3_3](https://doi.org/10.1007/978-3-319-12886-3_3).

High-order visualization with ELVis.

J. Peiró, **D. Moxey**, B. Jordi, S. J. Sherwin, B. W. Nelson et al.
IDIHOM: Industrialization of High-Order Methods-A Top-Down Approach, pp. 521–534.
DOI: [10.1007/978-3-319-12886-3_24](https://doi.org/10.1007/978-3-319-12886-3_24).

Conference Proceedings

2018

High-order curvilinear hybrid mesh generation for CFD simulations

J. Marcon, M. Turner, J. Peiró, **D. Moxey**, C. R. Pollard et al.
2018 AIAA Aerospace Sciences Meeting.
DOI: [10.2514/6.2018-1403](https://doi.org/10.2514/6.2018-1403).

2017

Towards p -adaptive spectral/ hp element methods for modelling industrial flows

D. Moxey, C. D. Cantwell, G. Mengaldo, D. Serson, D. Ekelschot et al.
Spectral and High Order Methods for Partial Differential Equations ICOSAHOM 2016, pp. 63–79.
DOI: [10.1007/978-3-319-65870-4_4](https://doi.org/10.1007/978-3-319-65870-4_4).

A framework for the generation of high-order curvilinear hybrid meshes for CFD simulations

M. Turner, **D. Moxey**, J. Peiró, M. Gammon, C. R. Pollard and H. Bucklow.
Procedia Engineering. Vol. 203, pp. 206–218.
DOI: [10.1016/j.proeng.2017.09.808](https://doi.org/10.1016/j.proeng.2017.09.808).

2016

The wing-tip vortex test case

J.-E. Lombard, **D. Moxey** and S. J. Sherwin.
European Congress on Computational Methods in Applied Sciences and Engineering, Crete, Greece.

Automatic generation of 3D unstructured high-order curvilinear meshes

M. Turner, **D. Moxey**, S. J. Sherwin and J. Peiró.
Proceedings of the European Congress on Computational Methods in Applied Sciences and Engineering, pp. 428–433.
DOI: [10.7712/100016.1825.8410](https://doi.org/10.7712/100016.1825.8410).

A variational framework for high-order mesh generation

M. Turner, J. Peiró and **D. Moxey**.
Procedia Engineering. Vol. 82, pp. 127–135.
DOI: [10.1016/j.proeng.2016.11.069](https://doi.org/10.1016/j.proeng.2016.11.069).

Teaching Experience

- ’08 – today Lecturer, *Fundamental Tools*, **University of Warwick**
Fundamental Tools is an intensive week-long course, designed to prepare students for the Financial Mathematics M.Sc. and test their mathematical ability. It covers topics in linear algebra, differential equations and basic statistics. My responsibilities include setting a course syllabus, providing lectures and comprehensive lecture notes, organising seminar sessions/problem sheets and setting and marking examinations.
- ’15 – today Lecturer, *Introductory Mathematics*, **Imperial College London**
 This introductory mathematics course, taken by around 60 students, is part of two M.Sc. courses in the Department of Aeronautics, covering topics in vector calculus, linear algebra and basic real analysis. Responsibilities include setting lecture notes, delivering lectures to students and providing support.

2009 – 2011 Lecturer, *Programming for Scientists*, **University of Warwick**

This popular first-year undergraduate mathematics course of around 150 students introduces the basic concepts of mathematical and object-oriented programming using Java. My responsibilities included renewing the course syllabus to incorporate the latest Java techniques, rewriting lecture notes and programming lab sessions to adopt a more interactive lecturing style, as well as general course administration, setting assessments and marking the projects comprising the students' final grades.

2008 – 2011 Lecturer, *C++ for Financial Mathematics*, **University of Warwick**

This course is taken by students enrolled on the Financial Mathematics M.Sc. and provides a comprehensive overview of C++ from basics to multiple inheritance and STL usage, culminating in a project where students implement a finite-difference numerical solver for the Black-Scholes equation.

2011 Teaching Assistant, **Imperial College London**

2008 – 2011 Teaching Assistant, **University of Warwick**

2006 – 2010 Undergraduate Supervisor, **University of Warwick**
